# Power BI Training Offering 2024

Learn all the aspects of Power BI for what you need to enhance your report creation.

Standard Paths

We offer three standard training paths focused on different profiles to learn Power BI.

Power BI for Business Users (€600 per participant)

- Full day training.
- Learn how to
  - use Power BI as an end-user.
  - create simple reports.
- Training offered in English or Dutch.
- Training offered at client or provider location.
- Course material included.

Power BI for Data Analysts (€1500 per participant)

- Three-day training.
- Learn how to
  - model data for Power BI.
  - create simple power bi data models.
  - create attractive reports.
  - create simple DAX statements.
- Training offered in English or Dutch.
- Training offered at client or provider location.
- Course material included.

Power BI for Data Engineers (€1100 per participant)

- Two-day training.
- Learn how to
  - model data for Power BI.
  - create power bi data models.
  - create simple and advanced DAX statements.
- Training offered in English or Dutch.
- Training offered at client or provider location.
- Course material included.

These training paths provide a good starting point for someone new to Power BI and bring them up to speed.

Modular Offering

At Nemeon we think it's important to give companies the option to create their own training paths therefore we also offer our training in a modular approach. These modules not only contain training material covered in our standard training paths but also contain trainings on other aspects of Power BI.

Practical's

All trainings have a minimum of 5 participants and a maximum of 10 participants to ensure that everyone can have enough hands-on guidance. The training can be given both on-site at your offices or we can provide a location and can be hosted both in Dutch or in English. All training material will be provided after the training.

To book a training you can send an email to info@nemeon.io and we'll get back to you to setup a training moment for you.

In case of any questions about our offering or a request for a custom training not mentioned above you can also reach out to us.
